

DSBS Course

Indirect Treatment Comparisons

23rd September 2026, 09:00-15:00

Hosted by Novo Nordisk A/S

Registration now open!

Ever thought about how to compare treatments in the absence of a head-to-head trial?

This course will give an introduction to indirect treatment comparisons, an established methodology for cross-trial treatment comparisons in health technology assessment and reimbursement, with increasing importance throughout the entire drug development life cycle.

Specifically, the objectives of the course are to:

- Understand potential use cases for performing indirect treatment comparisons across the value chain
- Assess the feasibility of performing an indirect treatment comparison
- Understand novel covariate adjustment methodologies developed for cross-trial comparisons
- Interpret the results and perform critical analyses of an indirect treatment comparison

The course will take place in person and consist of a combination of lectures and exercises. A detailed agenda will be distributed beforehand, together with the course material and a list of R-packages to be used.

The course will be led by Antonio Remiro-Azócar, Principal Scientist at Novo Nordisk A/S and an internationally recognised expert in quantitative evidence synthesis and indirect treatment comparisons.

Venue: Novo Nordisk A/S (VTE), Østmarken 3A, Søborg.

Registration

Who can attend: DSBS members.
The course fee is DKK 1,500 including lunch and refreshments.

Please register using the below QR code and remember to indicate if you have any dietary requirement.

DSBS COURSE Indirect Treatment
Comparison September 23, 2026

Deadline

Please register no later than 9 September, 2026. There is a maximum number of 30 participants.

Note that registration is binding and the fee will not be refunded in case of cancellations.
